

Dr Robert Gaitskell QC

Dr Robert Gaitskell QC specialises in technology, engineering and construction disputes, often of an international nature. Robert predominantly acts as an arbitrator, adjudicator, dispute board member and mediator. In addition to being a lawyer, his background as a professional engineer is considered to be a 'significant asset' (C&P, 2020). He is the editor of 'Keating Construction Dispute Resolution Handbook' (3rd edition 2016); and a former Vice President of the IEE/ IET (Europe's biggest professional engineering institution).

Dr Gaitskell is currently acting as chairman or member of several arbitral tribunals (including those governed under SIAC, ACICA and AIAC rules), dealing with matters such as oil and gas installations and pipelines, power stations, oil and gas plants, petro-chemical works, and other complex and high-value engineering and process projects.

"An outstanding and pre-eminent arbitrator with the huge advantage of an engineering as well as a legal background." (Legal 500, 2020)
