

AN ACICA ROADSHOW EVENT: PERTH

Doing Evidence in Arbitration Better: Presenting the 2023 Evidence in International Arbitration Report

The 2023 Evidence in International Arbitration Report, which launched in September 2023, indicates that expert, lay and documentary evidence have a significant impact on case outcomes. The Report considers these impacts, and touches on sustainability, equal representation and other key trends. The findings are contextualised with editorials by leading thought leaders. The Report can be found [here](#).

The panellists will bring the Report to life for attendees in Perth. To provide practical tips, panellists will offer their varying perspectives, as counsel, experts, and arbitrators practising in international arbitration.

The event in Perth will also feature a live demonstration of a hearing set up at Dexus Place, with FTI Consulting showing in real-time how it can provide technical support.
